PROFESSIONAL SUMMARY

MCA student and Linux power user with a strong foundation in system automation and shell scripting. Experienced in developing and deploying web applications using Python, Django, and Git. Passionate about streamlining infrastructure through CI/CD and containerization, aiming to leverage hands-on experience in Linux environments to support cloud operations, automate workflows, and enhance deployment pipelines.

EDUCATION

Rajagiri College of Social Sciences <i>Master of Computer Applications (MCA)</i>	2025 – 2027 Ernakulam, Kerala
St. Thomas College, Palai (Mahatma Gandhi University) <i>Bachelor of Computer Applications (BCA)</i>	2021 – 2024 Palai, Kerala
Jawahar Navodaya Vidyalaya <i>12th CBSE (87%), 10th CBSE (89.6%)</i>	2014 – 2021 Wayanad, Kerala

TECHNICAL SKILLS

Operating Systems: Linux (Arch Linux), Windows
DevOps & Deployment: Docker, GitHub Actions, CI/CD, Git, cPanel, Makefiles
Scripting & Automation: Python, Shell Scripting
Web Technologies & Frameworks: Django, Flask, HTML/CSS, REST API, JSON
Methodologies & Soft Skills: Agile, Problem-Solving, Remote Collaboration

EXPERIENCE

RLabz <i>Web Developer</i>	December 2025 – Present Ernakulam, Kerala
- Managed the deployment and ongoing maintenance of the 11th International Conference (icswhmh.com), serving a global audience. - Ensured 99.9% high availability and a seamless environment by effectively managing production web hosting infrastructure. - Led front-end optimization efforts, tracking cross-device compatibility across 3+ major browser platforms.	
Christuraj Hostel <i>Website Administrator</i>	January 2022 – March 2024 Palai, Kerala
- Redesigned and administered the official website for Christuraj Hostel over a 2-year period, optimizing the UI for improved user engagement. - Monitored site performance, proactively updating web content and implementing critical web accessibility standards.	

PROJECTS

- System Resource Monitor** | *Java Swing, PostgreSQL, System Operations*
- Developed a robust application for real-time infrastructure monitoring, tracking live CPU, memory, and disk I/O metrics with minimal overhead.
 - Implemented a logging system via PostgreSQL, successfully recording monitoring sessions and 100+ historical snapshots.
 - github.com/shyamjames/SystemResourceMonitor
- Image Web Pipeline** | *Shell Scripting, Makefiles, Automation*
- Architected a high-performance automation pipeline employing Makefiles and shell scripting, significantly reducing build time for responsive web assets.
 - Streamlined practical workflows closely aligning with CI/CD methodologies to automate daily deployment readiness.
 - github.com/shyamjames/web-img-pipeline
- Email Spam Detection** | *Python, Django, Git*
- Built and fully deployed a spam detection system spanning a production backend, achieving high classification accuracy.
 - Managed the complete application lifecycle, from backend development to version control through Git and cross-platform Android/Web integration.
