PROFESSIONAL SUMMARY

MCA student with hands-on experience deploying and maintaining production systems on AWS (EC2, S3), including containerized environments with Docker and CI/CD pipelines via GitHub Actions. Managed live production infrastructure with 99.9% uptime for a global-facing web platform. Comfortable working in Linux-based environments and troubleshooting across application and infrastructure layers. Currently building broader exposure to cloud-native and DevOps practices; eager to grow into container orchestration, monitoring, and infrastructure automation.

PROJECTS

- Academic Evaluation Platform** | *Django, PostgreSQL, AWS EC2, AWS S3*
- Co-developed a system supporting 100+ concurrent users and ~15,000 records, now live and in active use by the college.
 - Implemented an advanced accessibility panel supporting dyslexia-friendly fonts, colorblind modes, and high-contrast themes.
- Answer Script Generation & Preparation Tool** | *.NET 8, Avalonia*
- Co-developed a .NET desktop application for generating and preparing answer scripts (bulk PDF/QR processing) for the evaluation platform pipeline.
 - Engineered high-throughput batch processing, generating 1,000+ scripts in under 30 seconds and scanning 400+ scripts per minute.
 - Deployed and actively used live by the college alongside the Academic Evaluation Platform.
