PROJECTS

- Academic Evaluation Platform** | *Django, PostgreSQL, AWS EC2, AWS S3, HTMX*
- Designed system to support 100+ concurrent users and ~15,000 records, currently in testing phase.
 - Deployed a scalable mark-entry pipeline on AWS EC2 using async task processing (Django-Q) and AWS S3.
 - Implemented an advanced accessibility panel supporting dyslexia-friendly fonts, colorblind modes, and high-contrast themes.
- System Resource Monitor** | *Java Swing, PostgreSQL, System Operations*
- Developed a robust application for real-time infrastructure monitoring, tracking live CPU, memory, and disk I/O metrics with minimal overhead.
 - Implemented a logging system via PostgreSQL, successfully recording monitoring sessions and 100+ historical snapshots.
 - github.com/shyamjames/SystemResourceMonitor
- Email Spam Detection** | *Python, Django, Git*
- Built and deployed spam detection system with production backend, integrated Android/Web clients via REST API.
 - Managed the complete application lifecycle, from backend development to version control through Git and cross-platform Android/Web integration.
